Welding Equipment is a welded tool used in the welding process, mainly includes arc welding, resistance welding etc.

Welding is defined as a process where two or more pieces of metal or thermoplastics are fastened together by use of heat and pressure. The process of applying heat softens the material and enables it to affix together as one in a joint area when an adequate amount of pressure is applied.

China is the largest production regions, occupied 37.67% market share, and the production was 6739.4 k units in 2015. Lincoln Electric, Colfax, Illinois Tool Works are the major producer, and the leading companies' occupied 55.92% market share.

The mainly product types include arc welding and resistance welding, arc welding occupied largest market, about 69.39%; welding equipment used mainly in the automotive, heavy Equipment, aerospace, electronics, medical, precision instruments, energy and chemical field.

Although welding equipment industry brings a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.

Over the next five years, LPI(LP Information) projects that Welding Equipment will register a 4.8% CAGR in terms of revenue, reach US\$ 13100 million by 2023, from US\$ 9900 million in 2017.
