Abstracts

A window blind is a type of window covering. There are many different kinds of window blinds which use a variety of control systems. A typical window blind is made up of several long horizontal or vertical slats of various types of hard material, including wood, plastic or metal which are held together by cords that run through the blind slats. Window blinds can be maneuvered with either a manual or remote control by rotating them from an open position, with slats spaced out, to a closed position where slats overlap and block out most of the light.

The technical barriers of Window Blinds are relatively low, resulting in numerous manufacturing enterprises. In the market, there are some relatively large enterprises, such as Hunter Douglas, Springs Window Fashions, Nien Made Enterprise, Hillarys, TOSO, Tachikawa Corporation, Ching Feng Home Fashions, Nichibei.

Window Blinds have a wide range of applications. Window Blinds are widely used in commercial and residential consumption, such as home, educational, institutional, healthcare / hospital, hospitality, office, retail / stores and others. With the increasing of global population and dispensable income, growing demand for consumer goods has driven the growth of global Window Blinds market. The demand for Window Blinds is expected to continue increasing.

In the past few years, the price of Window Blinds has decreased and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of Window Blinds.

As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. With the snatch for market share in emerging regions, the competition in Window Blinds industry

will become more intense.

Over the next five years, LPI(LP Information) projects that Window Blinds will register a 2.3% CAGR in terms of revenue, reach US\$ 5370 million by 2023, from US\$ 4790 million in 2017.
