Woodworking machines are used for process wood to get products with high precision and quality. Woodworking Machinery includes Drilling machinery, Painting machinery, Sanding machinery, Sawing machinery, Milling machinery, Edge sealing machinery, Plate-making machinery and so on.

In the coming years there is an increasing demand for woodworking machines in the regions of United States that is expected to drive the market for more advanced woodworking machines. Downstream customers, such as wood product manufacturers, carpentry contractors, and residential and nonresidential construction industries, will continue to be the major markets for the industry's products.

Usually, the woodworking machines industry market is low concentrated as the manufacturing technology of woodworking machines is relatively matures than some high-tech equipment. And some enterprises, like HOMAG Group, SCM, BIESSE GROUP and Weinig are well-known for the wonderful performance of their woodworking machines and related services. The consumption volume of woodworking machines is related to downstream industries and United States economy. As there will always be some uncertain in the United States economy in the following years, the growth rate of woodworking machines industry may not keep that fast. But it is surely forecasted that the market of woodworking machines is still promising.

Although the market competition of woodworking machines is fierce usually, there are many enterprises can obtain considerable profit form the manufacturing and marketing of woodworking machines and that is the reason that we believe there will also be enterprises enter this market.
