The global Achyranthes Bidentata Extract market size is predicted to grow from US\$ 15.41 million in 2025 to US\$ 23.77 million in 2032; it is expected to grow at a CAGR of 6.4% from 2026 to 2032.

In 2025, the global production of Achyranthes bidentata extract is approximately 630 tons, with an average selling price of about US\$25 per kilogram. The production capacity in 2025 is 860 tons, with an average gross profit margin of approximately 20-30%. Achyranthes bidentata extract is a product made from the traditional Chinese medicine Achyranthes bidentata through an extraction process, mainly containing saponins, steroids, and polysaccharides. It has the effects of promoting blood circulation, regulating menstruation, tonifying the liver and kidneys, strengthening muscles and bones, and promoting diuresis, and is widely used in medicine, health products, and cosmetics.

The upstream raw material of Achyranthes bidentata extract is mainly the dried root of the Amaranthaceae plant Achyranthes bidentata; its downstream industry chain mainly targets: the pharmaceutical field (used in traditional Chinese medicine and modern preparations for promoting blood circulation and strengthening muscles and bones), the health product field (as a core ingredient in dietary supplements for joint care and sports recovery), and the cosmetics field (added as a functional ingredient with anti-inflammatory, soothing, and microcirculation-promoting properties to high-end skincare products).

As a traditional Chinese herbal extract, Achyranthes bidentata extract has been gaining increasing attention in the global market in recent years. Rich in various active components such as saponins, flavonoids, and organic acids, Achyranthes bidentata

extract possesses multiple benefits, including promoting blood circulation, anti-inflammatory, antioxidant, and immune-regulating effects. It is widely used in traditional Chinese medicine, health supplements, cosmetics, and food additives. With the growing consumer demand for natural, plant-derived health products, the market prospects for *Achyranthes bidentata* extract are promising, especially in the Asia-Pacific region, where demand is steadily increasing. Furthermore, the increasing demand for natural health products and traditional herbal medicines in Europe and the Americas presents new opportunities for the export of *Achyranthes bidentata* extract.

However, market expansion also faces certain challenges, such as the instability of raw material supply, fluctuations in production costs, and uncertainties in industry regulations. To address these challenges, companies need to innovate in research and development and production technologies while ensuring product quality stability. Overall, thanks to its natural, safe, and multi-functional characteristics, *Achyranthes bidentata* extract is expected to continue to capture an increasingly larger market share in the coming years.
