## Abstracts

The global AI-Powered PTZ Video Conference Camera market size is predicted to grow from US\$ 4784 million in 2025 to US\$ 10198 million in 2032; it is expected to grow at a CAGR of 13.1% from 2026 to 2032.

In 2025, global production of AI-powered PTZ video conference cameras is expected to reach approximately 12.38 million units, with an average selling price of around USD 395 per unit. AI-powered PTZ video conference cameras integrate pan, tilt, and zoom (PTZ) functionalities with artificial intelligence algorithms, enabling automatic identification and tracking of participants, adjusting camera angles and focal length for precise image capture. Widely used in corporate meetings, remote education, live streaming, and large-scale event venues, these devices leverage AI algorithms to optimize video during multi-participant interactions, automatically switch cameras, and synchronize audio-video, enhancing meeting efficiency and user experience, while remaining compatible with major video conferencing software and cloud platforms, making them essential hardware for modern smart offices and remote collaboration.

Currently, the market for AI-powered PTZ video conference cameras is experiencing rapid growth, driven mainly by remote work, online education, enterprise digital transformation, and live streaming events. From a market perspective, there are many manufacturers, but AI algorithm capability, PTZ optical precision, and system compatibility remain significant technical barriers, with core competitiveness focused on auto-tracking accuracy, image stability, and multi-platform compatibility. In terms of trends, the industry is moving toward higher resolution, more intelligent tracking algorithms, faster PTZ response, and remote management capabilities, while emphasizing cross-platform compatibility and user-friendly operation. Market perspectives suggest that as remote work becomes normalized, education digitalization

expands, and demand for intelligent meetings rises, the market potential for AI-powered PTZ video conference cameras will continue to grow, with high-performance, highly intelligent products driving future market development.
