Air Preparation Products (FRL) refer to Filter-Regulator-Lubricator units used in pneumatic systems to condition compressed air before it reaches actuators, valves, and other components. The filter removes contaminants like dust, moisture, and oil to ensure clean air. The regulator controls and stabilizes air pressure to maintain consistent operation. The lubricator adds a fine mist of oil to reduce friction and wear in pneumatic tools and machinery. FRL units improve efficiency, extend equipment lifespan, and ensure reliable performance in industrial automation, manufacturing, and air-powered tools.
