The global Ajuga Extract market size is predicted to grow from US\$ 54.68 million in 2025 to US\$ 90.92 million in 2032; it is expected to grow at a CAGR of 7.6% from 2026 to 2032.

In 2025, the global production of Ajuga Extract was approximately 860 tons, with an average selling price of about US\$65 per kilogram. The production capacity in 2025 is 1050 tons, with an average gross profit margin of approximately 25-35%. Ajuga Extract is a natural product extracted from the plant Ajuga of the Lamiaceae family. It mainly contains active ingredients such as ecdysterone and has effects such as clearing heat and detoxifying, cooling the blood and reducing swelling, anti-inflammatory, and neuroprotective properties. It is commonly used to treat sore throat, bruises, and hemoptysis caused by lung heat, and has applications in the fields of health supplements and traditional medicine.

The upstream of the Ajuga Extract industry chain mainly involves the cultivation and harvesting of Ajuga decumbens, a plant widely distributed in China, India, and Southeast Asia. The quality and supply of upstream raw materials directly affect the yield and quality of the extract. In terms of downstream applications, Ajuga decumbens extract is widely used in the health supplement industry to prepare herbal health products with nourishing effects on the liver and kidneys, and strengthening effects on muscles and bones; in the pharmaceutical industry, it is used as a component of traditional Chinese medicine to treat symptoms such as kidney deficiency, lower back pain, and joint pain; in addition, Ajuga extract is also used in the cosmetics industry as a natural ingredient added to skincare products, providing antioxidant and anti-aging effects.

As a traditional Chinese medicine ingredient, Ajuga Extract has been gaining increasing attention in the global herbal health products and natural medicine market in recent

years. In traditional Chinese medicine, Ajuga is widely used to nourish the liver and kidneys, strengthen muscles and bones, and treat kidney deficiency and lower back pain, exhibiting significant pharmacological effects. With the increasing consumer demand for natural, side-effect-free herbal ingredients, the market demand for Ajuga Extract is steadily rising. Especially in Asian countries such as China and India, Ajuga Extract is widely used, and the demand in traditional Chinese medicine, nutritional supplements, and health products is continuously expanding. Meanwhile, the growing interest in herbal and natural ingredients in European and American markets is also driving the penetration of Ajuga Extract into the international market.

In terms of application, Ajuga Extract extract is primarily used in health products and nutritional supplements to help improve kidney function and enhance physical strength. In addition, it is also widely used in the pharmaceutical industry as part of traditional Chinese medicine for treating kidney deficiency, joint pain, and other issues. With consumers' increasing preference for healthy and green products, the application of Ajuga extract is gradually expanding to the cosmetics industry, where it is added to skincare products as a natural anti-aging and antioxidant ingredient.

However, the production of Ajuga Extract faces challenges such as climate change, planting area, and farmland management, which may affect the stability of its supply. Overall, with the continuous growth of market demand, the market prospects for Ajuga Extract are broad, especially in the health products and natural health supplements sectors.
