## Abstracts

The global Artemisia Capillaris Extract market size is predicted to grow from US\$ 43.14 million in 2025 to US\$ 64.80 million in 2032; it is expected to grow at a CAGR of 6.0% from 2026 to 2032.

In 2025, the global production of Artemisia Capillaris extract is approximately 1260 tons, with an average selling price of about US\$35 per kilogram. The production capacity in 2025 is 1520 tons, with an average gross profit margin of approximately 20-30%. Artemisia capillaris extract is a plant extract made from the dried aerial parts of the traditional Chinese medicine Artemisia capillaris. Its main components include flavonoids, coumarins, and volatile oils, and it has pharmacological effects of clearing heat, promoting diuresis, and reducing jaundice. It is commonly used to treat damp-heat jaundice, acute hepatitis, and other diseases.

The upstream raw materials for Artemisia capillaris extract mainly consist of the dried aerial parts of the Asteraceae plant Artemisia capillaris; its downstream applications are primarily in liver-protecting traditional Chinese medicines and health products, pharmaceutical preparations, functional foods and beverages, and are gradually expanding to cosmetics (primarily for antioxidant and anti-inflammatory effects).

Artemisia Capillaris extract is a natural ingredient extracted from the Artemisia Capillaris plant, widely used in traditional Chinese medicine, health supplements, cosmetics, and the food and beverage industry. In recent years, with the growing demand for natural health products, the market for Artemisia Capillaris extract has been expanding. Due to its various biological activities, including detoxification, antibacterial, anti-inflammatory, hepatoprotective, and hypoglycemic effects, Artemisia Capillaris extract is highly favored by consumers and the pharmaceutical industry. Its application has received

increasing attention, particularly in traditional Chinese medicine and modern drug development.

According to market research, the global market for Artemisia Capillaris extract is expected to continue growing. China is a major production and consumption market, and demand in European and American markets is also gradually increasing with rising health awareness. The market potential of Artemisia Capillaris extract is particularly evident in the areas of liver health and anti-inflammation. It is expected that the market for Artemisia Capillaris extract will further expand in the coming years as consumers increasingly favor natural and plant-derived ingredients.

However, market growth also faces certain challenges, mainly including the stability of raw material supply, fluctuations in production costs, and constantly evolving regulations. To maintain competitiveness, companies need to strengthen R&D investment, improve extraction technologies, and ensure product quality and stability. Furthermore, driven by global health trends, the application areas of Artemisia Capillaris extract are expected to expand further, offering promising market prospects.
