## Abstracts

The global Atractylodes Extract market size is predicted to grow from US\$ 22.71 million in 2025 to US\$ 35.05 million in 2032; it is expected to grow at a CAGR of 6.4% from 2026 to 2032.

In 2025, the global production of Atractylodes extract was approximately 860 tons, with an average selling price of about US\$27 per kilogram. The production capacity in 2025 was 1100 tons, with an average gross profit margin of approximately 20-30%.

Atractylodes extract is a plant extract obtained from the dried rhizomes of Atractylodes, a plant belonging to the Asteraceae family. Its main components are volatile oils and flavonoids. It has the effects of drying dampness, strengthening the spleen, dispelling wind and cold, and improving vision, and is often used to treat dampness obstruction in the middle burner, abdominal distension, diarrhea, and rheumatic pain.

The upstream core raw material of Atractylodes extract is dried Atractylodes rhizomes, mainly sourced from standardized cultivation or wild harvesting of specific varieties such as \*Atractylodes macrocephala\* or \*Atractylodes lancea\*, to ensure the stability and effectiveness of its key active ingredients. Its downstream application industries are mainly concentrated in the fields of traditional Chinese medicine and health and wellness, where it is widely used as a standardized raw material or additive in the research and production of traditional Chinese medicines for strengthening the spleen and dispelling dampness, herbal formula granules, preventive health products, natural food flavors, and animal feed.

Atractylodes extract, derived from the roots of Atractylodes, is a commonly used herb in traditional Chinese medicine, possessing multiple functions including strengthening the spleen and stomach, dispelling dampness, and reducing swelling. With increasing consumer health awareness and the expansion of the natural plant extract market, the application of Atractylodes extract has gradually extended from traditional Chinese

medicine to various fields such as health foods, functional foods, and cosmetics. Rich in active components such as volatile oils and flavonoids, Atractylodes extract exhibits antioxidant, anti-inflammatory, and antibacterial effects, making it increasingly popular among consumers.

In recent years, with the global spread of traditional Chinese medicine culture, especially in the European and American markets, the demand for natural plant ingredients has increased significantly. Atractylodes extract, as a herbal ingredient with multiple pharmacological effects, is gradually being widely used in health supplements, anti-aging products, and weight loss products. In the Chinese and Southeast Asian markets, Atractylodes extract remains an important ingredient in traditional Chinese medicine preparations, with steady growth in demand. Furthermore, with the development of modern technology, the extraction process and quality control of Atractylodes extract have continuously improved, boosting its competitiveness in the global market.

In the future, the Atractylodes extract market will continue to grow, especially in areas such as digestive health, immune regulation, and anti-aging, where it has broad application prospects. As consumers increasingly prefer natural, side-effect-free health products, the market demand for Atractylodes extract will further expand, driving its continued development in the global market.
