## Abstracts

The global Automotive Electronic Dashboard market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

According to its working principle, the automotive instrument panel can be divided into three types: mechanical instrument panel, electronic instrument panel (mainly LCD) and auxiliary display panel; Among them, the electronic instrument panel is mainly used in high-end vehicles and new energy passenger vehicles. Due to the advantages of electronic instrument panel compared with ordinary instrument panel, such as better stability, richer display information, diversified styles and high level sense of science and technology, more and more vehicles are equipped with electronic instrument panel, and the size of electronic instrument panel is becoming larger and larger, and it is also widely used in the intelligent cockpit with HUD integration. Carrying electronic instrument panel has become an inevitable trend of the development of intelligent vehicles.

Automotive is a key driver of automotive electronic dashboard industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world"s automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them,

China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
