The global Dictamnus Dasycarpus Extract market size is predicted to grow from US\$ 36.16 million in 2025 to US\$ 57.33 million in 2032; it is expected to grow at a CAGR of 6.8% from 2026 to 2032.

In 2025, the global production of Dictamnus dasycarpus extract was approximately 1320 tons, with an average selling price of about US\$28/kg. The production capacity in 2025 was 1550 tons, with an average gross profit margin of approximately 25-35%. Dictamnus dasycarpus extract is an active ingredient extracted from the root bark of the traditional Chinese medicine plant Dictamnus dasycarpus. It mainly contains alkaloids such as dictamnine, skimmianine, and fagarine, as well as flavonoids. These components give the extract various pharmacological effects, including clearing heat and dampness, dispelling wind and detoxifying, antibacterial, anti-inflammatory, antioxidant, and immune regulation.

The upstream core raw material of Dictamnus dasycarpus extract is Dictamnus dasycarpus root bark, the dried root bark of the Rutaceae plant Dictamnus dasycarpus. Its quality is affected by the origin, harvest year, and processing methods. Downstream, it is mainly used in industries with extremely high requirements for safety and efficacy, most notably the cosmetics and personal care industry, where it is used in the development of anti-allergic, soothing, and repairing skincare products; secondly, in the pharmaceutical industry, as a raw material for topical traditional Chinese medicines and lotions used to treat skin diseases such as eczema and dermatitis. In addition, there are also preliminary applications in a few high-end pet care and health food products.

Dictamnus dasycarpus extract is derived from the traditional Chinese medicinal plant Dictamnus dasycarpus. Due to its pharmacological effects such as clearing heat and

detoxifying, anti-inflammatory, antibacterial, and antipruritic properties, it is widely used in the pharmaceutical, health food, cosmetics, and food industries. In recent years, with the increasing consumer demand for natural, plant-based products, the market prospects for *Dictamnus dasycarpus* extract have been steadily improving. In China and other East Asian countries, *Dictamnus dasycarpus* extract is a commonly used ingredient for treating eczema and allergic skin diseases due to its unique effects on skin care and immune regulation, and is particularly widely used in natural skincare products.

Furthermore, with the increasing global consumer interest in plant extracts, the demand for *Dictamnus dasycarpus* extract in European and American markets has also increased. Its applications in antibacterial and anti-inflammatory aspects are gradually gaining recognition, especially its increasing use in anti-aging and skin repair products. In the future, with the advancement of scientific research and the expansion of application fields, the market for *Dictamnus dasycarpus* extract will further expand. The industry is relatively fragmented, mainly dominated by some traditional Chinese medicine extraction companies, but with the gradual improvement of product certification, market concentration is expected to increase. Overall, the market for *Dictamnus dasycarpus* extract will maintain steady growth in the coming years, especially in the plant-based skincare and traditional Chinese medicine health product sectors.
