Disposable Trachea Intubation Tube is a single-use, sterile, disposable, flexible intubation tube that can be used to facilitate the placement of a flexible tube into the trachea to maintain an open airway. A tracheal tube is a catheter that is inserted into the trachea for the primary purpose of establishing and maintaining a patent (open and unobstructed) airway. Tracheal tubes are frequently used for airway management in the settings of general anesthesia, critical care, mechanical ventilation, and emergency medicine. Many different types of tracheal tubes are available, suited for different specific applications.
