In 2025, the global production of *Drynaria fortunei* extract is approximately 1160 tons, with an average selling price of about US\$28 per kilogram. The production capacity in 2025 is 1450 tons, with an average gross profit margin of approximately 20-30%. *Drynaria fortunei* extract is an active ingredient extracted from the dried rhizomes of the *Drynaria fortunei* plant (a member of the Polypodiaceae family). It mainly contains various compounds such as flavonoids, phenolic acids, and polysaccharides, and has effects such as lowering blood lipids, promoting bone healing, and anti-inflammatory and antioxidant properties. It is commonly used to treat osteoporosis, bruises, and other injuries, as well as in health supplements and skincare products.

The core upstream raw material for *Drynaria fortunei* extract is dried *Drynaria fortunei* rhizomes that meet pharmacopoeia standards, sourced from both wild harvesting and standardized cultivation. The downstream applications are extensive, mainly concentrated in the health and wellness industry, specifically as a key ingredient in the research and production of dietary supplements, functional foods and beverages, oral care products, and modern traditional Chinese medicine granules and over-the-counter topical preparations.

*Dryopteris fortunei* extract is a natural plant ingredient extracted from the *Dryopteris fortunei* plant. Primarily used in traditional Chinese medicine, it possesses multiple benefits, including strengthening bones, promoting fracture healing, and providing anti-inflammatory and analgesic effects. With increasing health awareness and the gradual

resurgence of traditional medicine, the demand for *Dryopteris fortunei* extract is continuously growing in the global market, especially in China, Southeast Asia, and some European and American countries, where it is widely used in health products and functional foods. In recent years, with the advancement of modern science and technology, the active components of *Dryopteris fortunei* extract have been further studied and developed. Its applications have expanded beyond the auxiliary treatment of orthopedic diseases to include recovery and health maintenance for athletes, treatment of joint diseases, and prevention of osteoporosis in the elderly.

The main forms of *Dryopteris fortunei* extract on the market include powders, capsules, tablets, and liquid extracts. These products are typically sold as health supplements, pharmaceuticals, or topical ointments. With the spread of traditional Chinese medicine culture, particularly the increasing demand for natural herbal products in Europe and the United States, the market prospects for *Dryopteris fortunei* extract are promising. It is projected that the global demand for *Dryopteris fortunei* extract will show steady growth, driven especially by the demand for health supplements and traditional Chinese medicine-related products. As consumers increasingly prefer natural, side-effect-free products, the market size of *Dryopteris fortunei* extract will further expand.
