100% silicone Foley catheter is a urinary catheter made entirely from silicone, a biocompatible material known for its flexibility, durability, and resistance to bacterial growth. Unlike latex or polyurethane catheters, silicone catheters are less likely to cause allergic reactions or irritation, making them suitable for long-term use. The catheter features an inflatable balloon that holds it securely within the bladder, and it is used for continuous urinary drainage in patients who are unable to void urine naturally. The silicone material ensures smooth insertion and minimizes discomfort, while also providing excellent resistance to encrustation and blockage.
