3A optical films refer to multifunctional optical films with anti-glare (AG), anti-reflective (AR) and anti-fingerprint (AF) functions. These films combine multiple functions and are widely used in various display devices, touch screens and other occasions that require optical management. 2A and 3A films mainly refer to optical films with two or three of these functions.

2A/3A is a general term for anti-reflection (AR) + anti-glare (AG) + anti-fingerprint (AF) functions. AR is the abbreviation of Anti reflection, which means anti-reflection. Through multi-layer optical design, it achieves the purpose of anti-reflection and anti-transmission.
