## Abstracts

The global 3-Finger Centric Gripper market size is predicted to grow from US\$ 782 million in 2025 to US\$ 1214 million in 2032; it is expected to grow at a CAGR of 6.5% from 2026 to 2032.

In 2025, global sales of 3-Finger Centric Grippers are estimated at 655,000 units, with an average price of approximately US\$1,220 per unit and a gross margin of approximately 25%–33%. The 3-Finger Centric Gripper is a type of robotic gripper unit that uses the equidistant radial movement of three claws to achieve symmetrical clamping relative to the workpiece's centerline. It typically consists of a main body housing, an internal wedge or gear-rack transmission mechanism, three synchronously moving claws (finger grippers), a guide slider/rail, and a pneumatic or electric drive module. During operation, the three claws move simultaneously inward or outward around the same center, achieving self-centering clamping of cylindrical, spherical, and polygonal workpieces. Compared to two-claw gripping, it is more tolerant of workpiece shape and position errors and easier to control concentricity and repeatability. It is particularly suitable for loading and unloading before and after turning/milling, and for gripping and transferring rotating parts such as shaft parts, gears, flanges, and bearing outer rings. General parameters include: clamping diameter range of 5–150 mm (extendable to over 300 mm for heavy-duty and special-purpose models), single-jaw clamping force from tens of Newtons to thousands of Newtons, repeatability of 0.01–0.05 mm, stroke of 2–20 mm, protection rating of IP40–IP67, and working life designed for 10 million cycles. Upstream supply mainly relies on alloy steel and aluminum alloy bars/forgings, hardened guides and sliders, needle/ball bearings and linear guides, seals and springs, and small cylinders or motor/encoder assemblies; downstream supply is concentrated among robot and gantry manipulator system integrators, machine tool and automation line OEMs, automotive and motor/reducer

manufacturers, 3C and precision manufacturing companies, etc.

United States market for 3-Finger Centric Gripper is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for 3-Finger Centric Gripper is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
