## Abstracts

The global 300 mm Wafer Shippers and Carriers market size is predicted to grow from US\$ 535 million in 2025 to US\$ 751 million in 2031; it is expected to grow at a CAGR of 5.8% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Wafer Shipping Boxes are the containers to transfer the wafers safely. The Wafer Shipping Boxes can be opened and closed with the help of robot to support the existing automation in the wafer transport and shipping. The Wafer Shippers and Carriers must comply with the semiconductor industry standards such as M31, E15.1, E57, E62 and others. The wafer transport box is so designed that it increases the wafer position accuracy along with its operability. The wafer transport box offers removable gasket that provides protection for external contamination. The wafer shipping boxes, or wafer transport box are packaged in horizontal wafer shippers and vertical wafer shippers. The advanced wafer transport boxes offer benefits over the traditional mid-range and low range wafer carriers. Some of them includes precise wafer access, reliable equipment operation with automated handling systems and secured wafer protection against damage and contamination.

Taiwan is the largest consumption region for wafer cassettes, with a consumption market share close to 19.75% in 2022. Followed by the United States, China, South Korea, Japan and other countries. The wafer box industry has a high threshold and requires certain production technology. At present, it is mainly monopolized by companies in the United States, Japan, South Korea, and Taiwan. New investments

require large amounts of capital, making it difficult for small businesses to enter the industry. The top 5 companies in the world have occupied 96.32% of the global market share. The combined output of the United States and Japan in 2022 will account for 89.26% of the global market share.
