3,3'-Dichlorobenzidine is an organic compound with the formula $(C_6H_3Cl_2(NH_2))_2$. The pure compound is pale yellow, but commercial samples are often colored. It is barely soluble in water and is often supplied as a wet paste. It is widely used in the production of diarylide yellow pigments used in the production of printing inks. Its use in the production of dyes has been largely discontinued because of concerns about carcinogenicity.
