According to our LPI (LP Information) latest study, the global 3D Laser Profile Sensor market size was valued at US\$ million in 2023. With growing demand in downstream market, the 3D Laser Profile Sensor is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global 3D Laser Profile Sensor market. 3D Laser Profile Sensor are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of 3D Laser Profile Sensor. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the 3D Laser Profile Sensor market.

The 3D laser profile sensor adopts the principle of laser triangle reflection to collect the two-dimensional profile information of the surface of different materials. Through a special lens group, the laser beam is magnified to form a static laser line and projected onto the surface of the object to be measured. The surface forms diffuse reflection, and the reflected light passes through the transmissive optical system and is projected onto the sensitive photosensitive matrix. In addition to the distance information (Z-axis) from the sensor to the measured surface, the controller can also calculate the image information and convert it into a two-dimensional coordinate system with the laser line centered on the sensor. The profiler measures and outputs two-dimensional coordinate values. By moving the object to be measured or the profiler detector, a three-dimensional measurement value can be obtained.

At present, the major manufacturers in the Chinese market include Keyence, Cognex, Leisho Optoelectronics, Hikvision Robotics, LMI Technologies, Micro-Epsilon, Teledyna DALSA, Vision Components, Qingbo Optoelectronics, Bozhida, etc. The top ten manufacturers share the ratio exceeds 67%.
