## Abstracts

The global 3D NAND Flash market size is predicted to grow from US\$ 574 million in 2025 to US\$ 850 million in 2031; it is expected to grow at a CAGR of 6.7% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

3D NAND flash memory is no longer a simple planar memory stack. This is just one of them, as well as VC vertical channels and VG vertical gates. 3D NAND flash memory has SLC, MLC and TLC types

In 3D NAND flash memory, manufacturers do not necessarily announce a lot of technical details. In particular, there is little mention of specific process technologies. 3D NAND flash memory of other vendors except Samsung is only now coming to market, and representative products are not enough.
