The global 4-Methoxy Acetophenone (4-MAP) market size is predicted to grow from US\$ 29.85 million in 2025 to US\$ 42.49 million in 2032; it is expected to grow at a CAGR of 5.3% from 2026 to 2032.

4-Methoxy Acetophenone (4-MAP) (CAS: 100-06-1) is a key intermediate in organic synthesis and a widely used fragrance ingredient. It presents as white flaky crystals and is characterized by a strong hawthorn blossom aroma, accompanied by undertones of hay and tonka bean.

Upstream production relies primarily on anisole and acetyl chloride (or acetic anhydride); the supply and pricing of these raw materials are significantly influenced by fluctuations in basic chemical markets and by environmental regulatory reviews. The core of midstream production lies in the Friedel-Crafts acylation reaction; key process challenges involve the selection of catalysts and balancing reaction yields against the effective treatment of industrial waste (the three wastes?). Downstream applications are extremely diverse, with the cosmetics sector specifically the synthesis of sunscreens such as Avobenzone representing the largest growth market.

In 2025, global sales volume is projected to reach approximately 7,900 tons, with an average selling price of approximately \$3,862 per ton. The industry's gross profit margin stands at around 30%.

4-Methoxy Acetophenone (4-MAP) is a quintessential example of a low-volume, high-value-added fine chemical, serving a dual role as both a raw material for fragrances and flavors and a functional intermediate. The industry is primarily driven by the inelastic growth of the downstream sunscreen market; in particular, the robust demand for

Avobenzone is globally recognized as the "gold standard" for UVA protection and provides a solid foundation for 4-MAP. Concurrently, however, the industry's development is constrained by factors such as limited market size and regulatory uncertainties. Consequently, future competition will increasingly center on cost control, product quality stability, customer certification, and integrated supply chain capabilities.
