4 piston calipers are physically bigger to fit the extra piston, meaning there's space for more fluid inside. More physical material and more fluid means they shed heat much better than a smaller 2 piston caliper, don't get as hot on descents, and have less loss of power, or less fade.

The global 4 Piston Calipers market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
