The global 48V Electric Machine market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

The 48-volt motor is an electric motor with a rated voltage of 48 volts, which is widely used in the electric auxiliary system of mild hybrid vehicles, the drive system of electric bicycles and electric motorcycles. It is characterized by high efficiency, low noise, smooth operation and high safety, and is suitable for low-voltage power systems. The 48-volt motor provides reliable power support in these applications. At the same time, due to the low voltage, it reduces the risk of electric shock, is easy to maintain, and has a relatively low cost. It is an ideal choice for many small and medium-power electric equipment.
