## Abstracts

The global 55% Al-Zn Sheet market size is predicted to grow from US\$ 11976 million in 2025 to US\$ 15327 million in 2032; it is expected to grow at a CAGR of 3.8% from 2026 to 2032.

55% Al-Zn sheet is produced by continuously hot-dip coating a cold-rolled steel substrate with an Al-Zn-Si alloy coating typically characterized by ~55% Al, 43.4% Zn and 1.6% Si, providing enhanced corrosion resistance. GALVALUME<sup>®</sup> is a registered trademark of BIEC International Inc., or one of its licensed producers, and is commonly used in the market to denote this 55% Al-Zn-Si coating system; however, for this report's technical scope, '55% Al-Zn sheet' is defined and quantified by the coating technology (55% Al-Zn-Si via continuous hot-dip coating) and is not limited to trademark-licensed products. Corrosion performance is driven by aluminum's long-term barrier protection, zinc's cathodic (sacrificial) protection, and silicon's role in improving coating-to-steel adhesion, which typically delivers better weathering durability and cut-edge protection than conventional hot-dip galvanized steel. Key upstream inputs include hot-rolled/cold-rolled base steel, aluminum ingot, zinc ingot, silicon alloy, plus fluxes and passivation/post-treatment chemicals. Manufacturing generally includes cold rolling, annealing, continuous hot-dip coating and surface finishing, requiring tight control of bath chemistry, coating uniformity, surface quality and paintability. Major downstream customers include building roofing and wall cladding systems, industrial enclosures and sandwich panel facings, prepainted steel producers, PV mounting/structural component manufacturers, and appliance/HVAC OEMs. On an ex-works manufacturing basis, global nominal capacity in 2025 is ~22.0 million tonnes, actual sales are ~12.38 million tonnes, and the global weighted average ex-works price is ~US\$989/tonne; manufacturing gross margins are typically ~10%?14%, influenced by Al/Zn price swings and regional supply?demand and competitive dynamics.
