Communication towers are an important part of wireless communication systems. During the 5G construction process, 5G AAU equipment will be mounted on some communication towers. Some sites did not consider the energy consumption when adding 5G equipment in the early stage of construction. At this time, power expansion needs to be considered; in view of the above, it is necessary to provide outdoor integrated cabinets for functional purposes such as power cabinets and equipment cabinets.

5G communication base station outdoor integrated cabinet solution integrates main equipment, system power supply, AC and DC power distribution, battery, lightning protection grounding equipment, temperature control, dynamic environment monitoring (power distribution monitoring, rectifier module monitoring, air conditioning control, temperature and humidity monitoring, flood monitoring, access control, smoke detection, vibration monitoring, etc.). There are a variety of cabinets for the cabinets, which can be used as functional cabinets (power cabinets, battery cabinets, transmission cabinets, etc.), helping operators to achieve easy site selection, energy saving and emission reduction, and rapid deployment to meet the needs of more energy-saving, land-saving, and green 5G communication network construction.
