A 5G indoor coverage solution is a communication system that enhances 5G signal penetration, capacity and coverage inside buildings using distributed antennas, small cells, digital DAS, repeaters and integrated radio units. It is widely deployed in office buildings, shopping malls, stadiums, airports, hospitals, hotels, factories, data centers and enterprise campuses to provide reliable high-speed indoor 5G connectivity..The global 5G indoor coverage solution industry generally maintains a gross margin of 28%–46%, driven by high-end radio hardware, multi-antenna systems, software-defined features and integration services.The supply chain of 5G indoor coverage solutions includes upstream suppliers of radio chips, baseband processors, optical modules, antennas, cabling and power systems. Midstream vendors provide small cells, digital DAS, distributed radio units, system integration, cloud management and optimization software. Downstream users include telecom operators, enterprises, building owners, industrial manufacturers, public venues and ICT integrators.

5G is a key and cross-age technology that opens the era of the Internet of Everything, and all countries are grabbing market share. The Global Mobile Economy Development Report 2023 released by GSMA Intelligence pointed out that by the end of 2022, the number of global mobile users would exceed 5.4 billion. The mobile ecosystem supports 16 million jobs directly and 12 million jobs indirectly. China is a leader in 5G technology. According to the latest statistics from the Ministry of Industry and Information Technology, China newly added 887,000 5G base stations in 2022 (currently reaching 2.312 million, accounting for more than 60% of the world's total), and 110 cities in China

have reached gigabit city construction standard. According to the Digital China Development Report (2022) released by the State Internet Information Office, by the end of 2022, China had built a total of 2.312 million 5G base stations, with 561 million 5G users, accounting for more than 60% of the world.
