The global 5G Monetization Business Strategy market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

5G Monetization and Adoption Strategies CIS focuses its research on the impact this next generation of connectivity will have on consumers and businesses over the next 10 years. The program covers how 5G is enabling integration of diverse technologies such as IoT, AI, robotics, cloud, and edge compute in a mobile setting, leading to the emergence of new products and services and how vendors and service providers alike are monetizing use cases. IDC's 5G Monetization and Adoption Strategies examines the ecosystem implications to device manufacturers, network software vendors, systems integrators, content providers, application developers, industry verticals, and mobile operators as they partner to deliver 5G-enabled services to consumers and businesses and drive increased connectedness globally.

5G is a key and cross-age technology that opens the era of the Internet of Everything, and all countries are grabbing market share. The Global Mobile Economy Development Report 2023 released by GSMA Intelligence pointed out that by the end of 2022, the number of global mobile users would exceed 5.4 billion. The mobile ecosystem supports 16 million jobs directly and 12 million jobs indirectly.

China is a leader in 5G technology. According to the latest statistics from the Ministry of Industry and Information Technology, China newly added 887,000 5G base stations in 2022 (currently reaching 2.312 million, accounting for more than 60% of the world's total), and 110 cities in China have reached gigabit city construction standard. According to the Digital China Development Report (2022) released by the State

Internet Information Office, by the end of 2022, China had built a total of 2.312 million 5G base stations, with 561 million 5G users, accounting for more than 60% of the world.
