## Abstracts

The global 5G Security Solution market size is predicted to grow from US\$ 2286 million in 2025 to US\$ 7700 million in 2032; it is expected to grow at a CAGR of 19.3% from 2026 to 2032.

5G Security Solutions encompass cybersecurity technologies designed to protect the 5G core network, radio access network, network slicing, edge computing, IoT devices, identity authentication and enterprise 5G deployments. Gross margins typically range between 48%–72%, driven by high-value security analytics, cloud-native functions, orchestration platforms, and zero-trust frameworks. The supply chain includes upstream cloud-native stacks, security algorithms, 5G core vendors and identity management systems; midstream vendors provide firewalling, network slice isolation, SEPP, signaling security, MEC protection and 5G intrusion detection; downstream customers include telecom operators, cloud providers, industrial 5G owners, enterprises and government networks.

5G is a key and cross-age technology that opens the era of the Internet of Everything, and all countries are grabbing market share. The Global Mobile Economy Development Report 2023 released by GSMA Intelligence pointed out that by the end of 2022, the number of global mobile users would exceed 5.4 billion. The mobile ecosystem supports 16 million jobs directly and 12 million jobs indirectly. China is a leader in 5G technology. According to the latest statistics from the Ministry of Industry and Information Technology, China newly added 887,000 5G base stations in 2022 (currently reaching 2.312 million, accounting for more than 60% of the world's total), and 110 cities in China have reached gigabit city construction standard. According to the Digital China Development Report (2022) released by the State Internet Information Office, by the end of 2022, China had built a total of 2.312 million 5G base stations, with 561 million

5G users, accounting for more than 60% of the world.
