In 2025, the global production of ABC National Standard Dry Powder Fire Extinguishing Agent reached 980,000 tons, with an average selling price of US\$641/ton. ABC National Standard Dry Powder Fire Extinguishing Agent is a dry powder fire extinguishing agent with ammonium dihydrogen phosphate as the main component, which complies with Chinese national standards. It achieves high-efficiency fire extinguishing through a dual mechanism of physical isolation of oxygen and chemical inhibition of chain reaction. It has the characteristics of high-efficiency fire extinguishing, wide applicability and strong environmental protection. It is suitable for extinguishing Class A fires, Class B fires, Class C fires and fires involving electrical equipment, but not suitable for metal fires (such as magnesium and sodium) and acid and alkali fires. ABC standard dry powder fire extinguishing agent is generally filled into portable dry powder fire extinguishers, wheeled fire extinguishers, and dry powder fire trucks for fire prevention and suppression in oil depots, warehouses, ships, substations, cable tunnels, power distribution rooms, petrochemical facilities, and other locations. The upstream of the industry chain consists of phosphorus chemical raw materials (phosphates, monoammonium phosphate, etc.), additives and coating materials, and packaging materials; the midstream consists of manufacturers who handle powder formulation mixing, sieving and drying, flowability and anti-caking treatment, testing (including moisture content, particle size, flowability, and fire extinguishing rating verification), and filling into fire extinguishers/dry powder systems; the downstream consists of fire extinguisher manufacturers. The gross profit margin ranges from 15% to 25%.
