The global Absorbing Stealth Material EPMI market size is predicted to grow from US$ 52.07 million in 2025 to US$ 143 million in 2032; it is expected to grow at a CAGR of 15.9% from 2026 to 2032.

In 2024, global Absorbing Stealth Material EPMI production reached 64,600 cubic meters, with an average selling price of $714.28 per cubic meter. Absorbing Stealth Material EPMI is a polymethacrylimide (PMI) based foam core material designed for stealth applications. During processing, carbon particles are added to the polymer, creating a conductive foam product with excellent dielectric properties and the ability to absorb electromagnetic waves at radar frequencies. Zhaoheng Technology's EPMI absorbing foam has successfully broken the long-standing blockade imposed by foreign companies on the Chinese absorbing PMI foam market, enabling domestic substitution. Its mechanical properties, such as tensile strength and shear strength, surpass those of comparable international models, while its electromagnetic absorption performance covers a wider frequency band and is over 30% less expensive than imported materials. This represents a significant breakthrough in breaking the monopoly, improving performance, and reducing costs.

United States market for Absorbing Stealth Material EPMI is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Absorbing Stealth Material EPMI is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
