Abstracts

The global AC (Alternating Current) Fans market size is predicted to grow from US$ 10950 million in 2025 to US$ 14100 million in 2032; it is expected to grow at a CAGR of 3.7% from 2026 to 2032.

AC Fans (Alternating Current Fans) are air-moving devices powered directly by alternating current. They convert electrical energy into mechanical energy through an AC induction motor or shaded-pole motor to generate airflow. Depending on the airflow direction, AC fans are commonly classified into axial, centrifugal types. They are widely used for ventilation, cooling, and air circulation in industrial, commercial, and residential environments due to their stable performance, high reliability, and mature technology.

In 2024, global AC Fans production reached approximately 649.8 million units, with an average global market price of around US$ 13.2 per unit.

The main raw materials for AC fans include silicon steel sheets, copper wire, aluminum alloy or steel housings, plastic impellers, and electronic components such as capacitors and bearings. Silicon steel sheets are mainly supplied by companies such as Baosteel, WISCO, and Nippon Steel, while high-grade copper wire suppliers include Tongling Nonferrous Metals and Jiangxi Copper. For motor bearings, leading brands such as NSK, NTN, and SKF provide precision components. Plastic resin materials used in impeller production are sourced from suppliers like SABIC, BASF, and LG Chem.

AC fans are widely applied in HVAC systems, industrial ventilation, refrigeration equipment, electronic enclosure cooling, and commercial and residential building ventilation. Major customers include air-conditioning and ventilation system manufacturers such as Midea, Gree, Daikin, Carrier, Haier, and industrial equipment

companies like Siemens, ABB, and Schneider Electric. In the building and infrastructure sectors, AC fans are used by engineering contractors and building solution providers such as China State Construction and Honeywell Building Technologies.

The gross margin of AC fans typically ranges from 22% to 35%, depending on fan size, application, and motor efficiency. High-performance and customized industrial models achieve higher margins, while standardized small axial fans for household or low-end applications usually have lower profitability due to price competition.

United States market for AC (Alternating Current) Fans is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for AC (Alternating Current) Fans is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for AC (Alternating Current) Fans is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key AC (Alternating Current) Fans players cover Ebm-Papst, ZIEHL-ABEGG, Greenheck, Systemair, Soler & Palau, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
