The global AC Arc Welding Machine market size is predicted to grow from US$ million in 2025 to US$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

There are two types of arc welding machines: DC and AC.

AC arc welders are less expensive and easier to maintain compared to DC arc welders. As a result, AC arc welders are commonly used for do-it-yourself (DIY) applications using household electrical outlets.

An AC arc welding machine is required to be equipped with an electric shock prevention device that suppresses the terminal voltage to 25V or less because of the high voltage at no load (standby state when the arc is not being generated).

AC arc welding machines are an essential tool in the welding industry, used for a variety of applications in construction, manufacturing, and repair work. The global market for AC arc welding machines is expected to grow steadily in the coming years, driven by increasing demand for welding equipment in emerging economies and the construction and automotive industries.

One of the key factors driving the growth of the AC arc welding machine market is the increasing adoption of automation and robotics in the welding industry. This trend is expected to drive demand for advanced welding equipment, including AC arc welding machines, that can deliver high-quality welds with greater efficiency and precision.

Another factor driving market growth is the increasing demand for lightweight and

portable welding equipment that can be easily transported to job sites. AC arc welding machines are well-suited for this purpose, as they are typically smaller and more lightweight than other types of welding equipment, making them ideal for use in remote locations or on construction sites.

In terms of regional market trends, Asia Pacific is expected to be a key growth market for AC arc welding machines, driven by rapid industrialization and infrastructure development in countries such as China and India. North America and Europe are also expected to see steady growth in the market, driven by demand from the construction and automotive industries.
