The global AC and DC Adapter market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of 2.1% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

AC and DC Adapter is a type of external power supply, often enclosed in a case similar to an AC plug. Other common names include plug pack, plug-in adapter, adapter block, domestic mains adapter, line power adapter, wall wart, power brick, and power adapter. Adapters for battery-powered equipment may be described as chargers or rechargers (see also battery charger). AC adapters are used with electrical devices that require power but do not contain internal components to derive the required voltage and power from mains power. The internal circuitry of an external power supply is very similar to the design that would be used for a built-in or internal supply.

The global AC and DC adapters market will grow at a CAGR of just over 2% during the forecast period. The growing popularity and use of mobile devices like tablets, smartwatches, and smartphones is a major contributor to the growth of the global AC and DC adapters market. Since mobile technology offers consumers easy access to the Internet and also allows them to do everyday tasks like shopping, banking and work.
