The global Activated Manganese Dioxide market size is predicted to grow from US\$ 110 million in 2025 to US\$ 159 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

In 2025, global sales volume of Activated Manganese Dioxide was approximately 23,000 tons, with an enterprise-side average selling price of about US\$4,900 per ton. The gross margin of major manufacturers was approximately 25%–40%.

Activated Manganese Dioxide is a manganese-based functional powder material mainly composed of MnO_2 , produced through activation treatment or characterized by high surface reactivity. It is usually available in black or dark brown powder or granular form. Compared with ordinary natural manganese dioxide, Activated Manganese Dioxide places greater emphasis on pore structure, specific surface area, redox activity, catalytic activity, and discharge performance. It can provide strong electron-transfer capability and surface activity in different reaction systems. The product can be produced from natural manganese ore through roasting, acid treatment, oxidation, crushing, and classification, or prepared through manganese salt chemical reactions, precipitation oxidation, and modified composite processes. It is a more functionalized and refined product within the broader manganese dioxide category.

The upstream raw materials of Activated Manganese Dioxide mainly include natural manganese dioxide ore, pyrolusite, manganese sulfate, manganese nitrate, potassium permanganate, and other manganese sources, as well as acids, alkalis, oxidants, reducing agents, additives, and crushing/classification equipment. Raw material purity, manganese content, impurity control, and activation process directly affect product activity, particle size, specific surface area, and stability. The midstream segment

covers preparation, activation, washing, drying, crushing, classification, and packaging of Activated Manganese Dioxide. Downstream applications mainly include battery materials, chemical synthesis, environmental catalysis, sealant materials, and industrial oxidants.

United States market for Activated Manganese Dioxide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Activated Manganese Dioxide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Activated Manganese Dioxide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Activated Manganese Dioxide players cover Vishnupriya Chemicals, Japan Metals & Chemicals, Suryansh Group, Siddharth Industries, Hunan QingChong New Materials, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
