The global Active RFID Readers market size is predicted to grow from US\$ 1748 million in 2025 to US\$ 3371 million in 2031; it is expected to grow at a CAGR of 11.6% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

This report focus on Active RFID Readers market. Active RFID readers use battery powered RFID tags that do not require energy from the readers for sending signals. Due to the fact that the active RFID tags have their own source of power and transmitter, it enables the tag to broadcast signals.

Active RFID systems are typically used for large applications, such as railway cars, reusable containers, and other objects that need to be monitored over long distances. In most cases, an active RFID system will operate on the ultra-high frequency (UHF) band, which offers a range of up to 100 meters.
