The global ADC Linkers market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

ADC linkers are one of the three main components of the antibody drug conjugates (ADC) that connect an antibody with a potent drug (payload) through a chemical bond. ADC linkers play key roles in determining the overall success of the Antibody Drug Conjugates. One of the main challenges in developing a safe and effective ADC drug is the assembly of a desirable chemical linker between cytotoxic payload and mAb. A well-designed ADC linker can help the antibody to selectively deliver and accurately release the cytotoxic drug at tumor sites. It also plays critical roles in an ADCs' stability during preparation, storage, and systemic circulation. A stable ADC drug ensures that less cytotoxic payloads fall off before reaching tumor cells, increasing safety, and limiting dose.

United States market for ADC Linkers is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for ADC Linkers is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
