The global Additive and Subtractive Composite Manufacturing Platform market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

The additive-subtractive composite manufacturing platform is a device that integrates additive manufacturing and subtractive processing technologies. It achieves precise control and processing of metal materials by combining heat sources such as lasers, electron beams, and plasma arcs with CNC machining centers. This kind of platform can first use additive manufacturing technology to stack metal materials layer by layer, and then accurately process the accumulated materials through subtractive processing technology, thereby achieving efficient manufacturing of complex parts. The additive-subtractive composite manufacturing platform has the characteristics of high precision, high efficiency and high degree of design freedom. It is widely used in aerospace, automobile manufacturing, medical equipment and other fields, providing a fast, flexible and high-performance metal parts manufacturing for various industries. solution.

The additive-subtractive composite manufacturing platform represents the forefront of manufacturing technology development. It combines traditional additive manufacturing and subtractive processing technologies, bringing new possibilities to the manufacturing industry. This platform can not only overcome the limitations of additive manufacturing technology and improve the surface quality and accuracy of parts, but also retain the high efficiency and precision of subtractive processing. By adding or subtracting composite manufacturing platforms, manufacturing companies can achieve a more flexible and efficient production process, speed up the product development cycle, and improve the quality and precision of parts manufacturing, thus promoting the transformation of the manufacturing industry to intelligence and digitalization, and

helping to achieve industrial upgrading and development. .
