These products include single-seat, two-seat, three-seat, and multi-seat sectional configurations and may feature manual or powered adjustment. Some mid- to high-end models also integrate zero-gravity positioning, massage, heating, USB charging, position memory, and smart controls. The reliability of reclining mechanisms and actuators, foam resilience, upholstery abrasion resistance, and structural load-bearing capacity directly affect product durability and comfort. Midstream manufacturers are responsible for product design, frame processing, reclining-mechanism assembly, upholstery production, electronic-control integration, and final-product testing.
