## Abstracts

The global Advanced Passive Cold Chain Temperature-controlled Container market size is predicted to grow from US$ 959 million in 2025 to US$ 1751 million in 2032; it is expected to grow at a CAGR of 9.1% from 2026 to 2032.

An Advanced Passive Cold Chain Temperature-Controlled Container is a professional thermal shipping system that maintains a specified internal temperature range without external electrical power or continuously operating refrigeration. The system typically combines high-performance insulation, phase change materials or other thermal energy storage media, a defined payload chamber, and a protective outer structure. Premium solutions commonly integrate Vacuum Insulation Panels with Phase Change Materials to minimize external heat transfer and stabilize payload temperatures through latent heat storage. These containers are primarily used for pharmaceuticals, vaccines, biologics, clinical trial supplies, cell and gene therapies, and other high-value temperature-sensitive life-science products. Typical qualified temperature ranges include 2–8°C, 15–25°C, frozen, and deep-frozen conditions. Compared with conventional insulated boxes, advanced passive systems provide longer thermal autonomy, higher payload efficiency, greater temperature stability, and stronger qualification capabilities for regulated pharmaceutical cold-chain transportation. In 2025, the global market for advanced passive cold chain temperature-controlled containers is valued at $980 million, with a sales volume of 1.62 million units and an average selling price of $605 per unit; the industry's average gross margin ranges from 32% to 40%. The Advanced Passive Cold Chain Temperature-controlled Container value chain begins with fumed-silica or fiberglass VIP core materials, high-barrier films, polyurethane, EPP/EPS, PP/PE engineering plastics, aluminum alloys, corrugated board, PCMs, eutectic materials, and gel-based thermal storage materials, followed by thermal engineering, insulation and container integration, refrigerant configuration,
