According to this study, the global Aerobic Wastewater Treatment Systems market size will reach US\$ million by 2031.

This report focus on Aerobic Wastewater Treatment Systems market. Aerobic treatment of wastewater is a biological process that uses oxygen to break down organic contaminants and other pollutants like nitrogen and phosphorous. Oxygen is continuously mixed into the wastewater or sewage by a mechanical aeration device, such as an air blower or compressor. Aerobic microorganisms then feed on the wastewater's organic matter, converting it into carbon dioxide and biomass which can be removed.
