According to our LPI (LP Information) latest study, the global Aerobridge market size was valued at US\$ million in 2023. With growing demand in downstream market, the Aerobridge is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global Aerobridge market. Aerobridge are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Aerobridge. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Aerobridge market.

Aerobridge is an enclosed, movable bridge which connects the airport terminal to aircraft parked there, so passengers can move directly to and from the plane without having to step out onto the tarmac.

Increasing passenger traffic at domestic as well as international airports is expected to drive the market. Moreover, increasing investments in installing operating aerobridges for domestic flights and rise in passenger in tier-II cities of developing countries are also expected to drive the market. However, lack of technical knowledge in handling the aerobridge causing accidents may limit the growth of the market.
