The global Aerogel Glass Fiber Mat market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Aerogel glass fiber felt is a flexible thermal insulation material that combines the characteristics of aerogel and glass fiber materials. Specifically, it is based on nano-silicon dioxide or metal aerogel as the main material, and is composited with reinforcing fibers such as glass fiber wool or pre-oxidized fiber felt through a special process. This material not only inherits the excellent thermal insulation performance of aerogel, but also has the strength and stability of glass fiber. Aerogel felt is the solid insulation material with the lowest thermal conductivity in the temperature range of about 400°C, which makes it excellent in thermal insulation. By compounding reinforcing fibers such as glass fiber, aerogel glass fiber felt has a certain tensile and compressive strength, which can meet the needs of different application scenarios. Aerogel glass fiber felt has good softness and easy cutting, and can easily adapt to the insulation needs of pipes and equipment of various shapes and sizes.

Glass fiber aerogel felt has excellent thermal insulation performance and is widely used in construction, aerospace, automotive industry, electronic products and other fields. Among them, construction and new energy vehicles are one of the main application areas of aerogel glass fiber felt. With the improvement of global energy conservation, emission reduction and environmental protection requirements, as well as the rapid development of the new energy vehicle industry, the demand for glass fiber aerogel felt will continue to grow. Especially in the field of new energy vehicles, aerogel glass fiber felt is an important thermal insulation material for power battery modules, and its market demand will show explosive growth. In summary, the aerogel glass fiber felt market will maintain a rapid growth trend at present and in the future. With the continuous

advancement of technology and the continuous expansion of market demand, the market will usher in a broader development prospect.
