The global Aerogel Insulation Mat market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Aerogel insulation mats are lightweight and high-performance thermal insulation materials that have applications in a variety of industries, including construction, oil and gas, aerospace, and automotive. They are made of aerogel, a material with a low thermal conductivity, high porosity, and high surface area, which makes it an excellent insulator. The aerogel insulation mats can be used for thermal insulation, acoustic insulation, and fire protection.

The global aerogel insulation mat market is expected to grow in the coming years due to the increasing demand for energy-efficient and sustainable building materials. The use of aerogel insulation mats in buildings can reduce energy consumption and greenhouse gas emissions. Additionally, the growing demand for lightweight and high-performance insulation materials in the aerospace and automotive industries is expected to drive the market growth.

United States market for Aerogel Insulation Mat is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
