The global Aesthetics Combination Therapy market size is projected to grow from US\$ million in 2022 to US\$ million in 2029; it is expected to grow at a CAGR of % from 2023 to 2029.

Due to a booming stock market and rising affluence, the increasing spending power in the United States is boosting the market for nice-to-have services, which include various beauty treatments. The rise in disposable income is more visible amongst the affluent class, who make up the largest customer base for advanced beauty services such as facelifts and rejuvenation therapies like dermal filling, microdermabrasion, chemical peeling, laser treatment and others. Other than this, a rising aging population and a burning desire to restore a youthful appearance are the other boosting factors for generating a healthy demand for beauty treatment services in the U.S. However, this phenomenon is not restricted to the U.S. alone. As per World Bank forecasts, the economic growth in the East Asian and Asia Pacific region is expected to be 5.7% approximately in 2017-18, and will continue to remain stable over the next three years. Due to this economic prosperity, the nice-to-have high end services in the beauty industry such as facial rejuvenation are going to have a positive impact. Moreover, private consumption expenditure is set to remain close to 8%, which further boosts the economic sentiment in such regions and leads to a deeper regional penetration of the aesthetics combination therapy market. Such factors are expected to create a favorable environment for the adoption of laser treatments and other expensive treatment procedures in the realm of aesthetics. This is set to boost the global aesthetics combination therapy market.
