Abstracts

The global Agentic AI Governance Platform market size is predicted to grow from US\$ 27555 million in 2025 to US\$ 169950 million in 2032; it is expected to grow at a CAGR of 29.8% from 2026 to 2032.

Agentic AI Governance Platform refers to enterprise software platforms that provide centralized governance, security, accountability and operational control over autonomous and semi-autonomous AI agents throughout their lifecycle. The research scope focuses on commercial software that treats AI agents as active digital entities capable of planning tasks, making decisions, accessing enterprise data, invoking APIs and tools, connecting with MCP servers, interacting with other agents and executing business workflows. Core capabilities typically include agent discovery and inventory, registry and ownership assignment, identity and delegated authorization, least-privilege access, policy management, runtime guardrails, human approval, behavioral monitoring, tracing and audit trails, risk assessment, compliance management and lifecycle control. Major product forms include standalone governance control planes and clearly productized governance modules embedded within AI governance, cybersecurity, identity security, cloud computing, enterprise software and automation platforms. The market primarily addresses enterprise requirements for consistent visibility, control, auditability and accountability across internally developed, SaaS-embedded, cloud-native and third-party AI agent environments.

Key Findings

North America is the leading supply and commercialization region, with the broadest representation across major Agentic AI Governance Platform technology routes

Full-stack control planes, security-led governance, identity governance and platform-native modules form the principal product positioning groups

Runtime authorization, agent identity, cross-platform discovery, policy enforcement and auditability are becoming key competitive differentiation capabilities

Market Trends

Agentic AI Governance Platform is moving beyond static AI inventory, policy documentation and model-level compliance toward an operational control layer capable of supervising AI agents while they act. The product roadmap is increasingly centered on centralized control planes, automated discovery of agent estates, accountable ownership, identity-aware access, contextual authorization, runtime policy enforcement, human-in-the-loop intervention and unified behavioral audit trails. Microsoft Agent 365, for example, is positioned as a centralized control plane for observing, governing and securing enterprise agents, while IBM introduced an Agentic Control Plane for operating, governing and scaling agents across enterprise environments; ServiceNow has also expanded AI Control Tower toward broader discovery, governance, security, observability and measurement of AI assets across systems. From the product-route perspective, governance is therefore shifting from determining whether an AI system satisfies a predefined policy toward determining whether a particular agent should be allowed to take a specific action at a specific time. Identity, delegated authority, tool access and cross-agent interactions are becoming especially important as agents gain greater autonomy and access to enterprise systems, creating convergence among AI governance, identity security, cybersecurity and enterprise control-plane software.

Market Dynamics

Drivers

The principal driver is the transition of enterprise AI agents from isolated experiments into production workflows that interact with corporate data, applications, APIs and business processes. As enterprises deploy agents created internally, embedded in SaaS applications or supplied through cloud and third-party ecosystems, they increasingly need a unified view of which agents exist, who owns them, what permissions they inherit and what actions they are authorized to execute. The policy and standards environment is also reinforcing governance demand. NIST launched its AI Agent Standards Initiative in February 2026 to advance secure and interoperable adoption of autonomous agents, while China's May 2026 policy on the standardized

application and innovative development of intelligent agents emphasizes safety, reliability, trustworthiness, standards and governance throughout agent development and deployment. The EU AI Act became broadly applicable on August 2, 2026, further strengthening enterprise focus on structured AI governance, accountability and traceability.

Restraints

The main restraint is that Agentic AI Governance Platform remains an emerging software category with significant overlap with AI Governance, Identity Governance, Privileged Access Management, AI Security, AI Gateway, MCP Gateway and Agent Observability. This overlap makes product boundaries, enterprise budgets and comparable pricing less standardized than in mature software markets. Large cloud, security and enterprise software providers can also bundle basic agent inventory, access control, monitoring or governance capabilities into broader contracts, reducing the immediate need for a separate platform in organizations with relatively simple agent environments. Implementation complexity is another constraint because effective governance may require integration with identity systems, data governance platforms, security tools, SaaS applications, agent frameworks and runtime gateways that are managed by different organizational functions. For enterprises still operating limited Agentic AI pilots, the economic value of a dedicated governance layer may therefore be harder to justify until agent numbers, autonomy and business-critical permissions increase.

Opportunities

The strongest market opportunity lies in governing heterogeneous agent estates that span multiple clouds, SaaS platforms, development frameworks and third-party providers. As enterprise adoption expands, organizations are likely to operate internally developed agents alongside cloud-native agents, embedded application agents and external digital workers, creating demand for vendor-neutral discovery, unified registries, standardized ownership models and portable governance policies. Runtime authorization represents another high-value opportunity because enterprises increasingly need to determine whether an individual action should be permitted based on the agent's identity, current task, requested tool, data sensitivity and delegated authority rather than relying on static credentials alone. Ping Identity's current Agent Governance positioning illustrates this evolution toward discovery, accountability and runtime control across platforms. Governance of MCP connections, agent-to-tool access, agent-to-data interaction and multi-agent delegation could consequently

develop into an important control layer between conventional identity management and application security, particularly in regulated or operationally sensitive environments.

Challenges

The industry faces continuing challenges in interoperability, standardization and sustainable differentiation. Agent frameworks, tool protocols, communication mechanisms, identity models and orchestration architectures are evolving rapidly, which requires governance vendors to support heterogeneous technical environments without introducing excessive operational complexity. Autonomous delegation also complicates traditional authorization concepts because an agent may operate on behalf of a human, invoke another agent or dynamically select tools while pursuing a broader objective. NIST's standards initiative specifically emphasizes interoperability and secure agent operation, reflecting the importance of these unresolved architectural issues. Commercially, independent vendors face an additional challenge as major enterprise, cloud and security platforms increasingly incorporate baseline discovery, registry, monitoring and policy capabilities into existing software suites. The long-term competitive threshold is therefore likely to move toward deeper runtime enforcement, cross-platform neutrality, contextual authorization, audit-grade evidence and governance of complex multi-agent relationships rather than basic inventory and dashboard functionality alone.

Value Chain Analysis

The upstream layer of the Agentic AI Governance Platform value chain consists of foundation models, cloud and computing infrastructure, enterprise identity systems, agent development and orchestration frameworks, APIs, MCP and other tool interfaces, cybersecurity infrastructure, data platforms and observability technologies. These upstream components provide the environment in which AI agents are developed and operated and simultaneously generate the identities, permissions, connections, tool calls, contextual information and behavioral telemetry required for effective governance. The midstream layer is the core Agentic AI Governance Platform market, where software vendors create value through agent discovery, registration, ownership mapping, identity and privilege management, policy configuration, risk assessment, runtime authorization, behavioral monitoring, intervention and audit evidence generation. As agent autonomy increases, value is gradually moving closer to the execution point because preventing an unauthorized or high-risk action before it occurs generally creates greater operational value than identifying the same event retrospectively.

The downstream layer comprises enterprises and public-sector organizations deploying AI agents across business processes. Revenue models are primarily software-based and can include SaaS subscriptions, enterprise platform licenses, usage-based charging, per-agent or identity-related pricing and governance functions bundled into broader cloud, security or enterprise software contracts. Consequently, cost structures are dominated by software research and development, security engineering, cloud infrastructure, integrations, enterprise sales and customer implementation rather than physical production. The ability to integrate with a broad range of third-party agent ecosystems, normalize governance data and enforce consistent policies across heterogeneous environments is becoming an important source of product value, while existing customer relationships and bundled distribution provide larger enterprise software and security vendors with meaningful commercial advantages.

Segment Insights

By primary product positioning, the market retains the established classification of Full-stack Agent Governance Control Plane, AI Governance & GRC-led Platform, Agent Security-led Platform, Agent Identity & Access Governance, Platform-native Agent Governance and Other solutions. Full-stack control planes provide the broadest functional scope by connecting agent inventory, policy management, runtime control and auditability within a unified governance layer. Security-led platforms emphasize threat detection, behavioral risk and intervention, while identity-oriented platforms focus on agent identity, credentials, privileges, human custodianship and delegated authorization. Platform-native governance represents another commercially important structure because cloud, automation, CRM, HCM and enterprise application vendors can integrate controls directly into environments where agents are already created and operated. The strategic requirement for standalone platforms is therefore to provide sufficiently stronger cross-platform visibility and enforcement to justify a separate enterprise governance layer.

By commercial architecture, standalone governance platforms coexist with security or identity platform extensions and enterprise software or cloud-native modules. Cross-platform Agent Governance is particularly relevant for organizations operating heterogeneous agent estates, while ecosystem-native governance provides tighter integration for customers concentrated within a specific cloud or enterprise application stack. Deployment models continue to span vendor-hosted SaaS, customer-managed private deployment and hybrid approaches, with regulated and security-sensitive organizations placing greater emphasis on control over credentials, sensitive telemetry

and enforcement points. These dimensions remain more suitable for formal market segmentation than individual capabilities such as Agent Discovery, Agent Observability or Guardrails because most commercial platforms combine multiple governance functions, making capability-based revenue segmentation susceptible to overlap and double counting.

Downstream Market Opportunities

Downstream opportunities are strongest in industries where AI agents gain access to sensitive information, privileged enterprise systems or processes carrying material financial, regulatory or operational consequences. Banking, financial services and insurance require granular authorization, segregation of duties and auditability; healthcare and life sciences place greater emphasis on protected data and accountable workflows; government and public-sector users require clear responsibility, security controls and institutional oversight; and technology and telecommunications companies are important early adopters because they typically operate more diverse AI and cloud environments. Manufacturing, industrial, retail and consumer-service organizations represent expanding opportunities as agents move beyond information assistance into procurement, customer operations, supply-chain coordination and workflow execution. The economic value of Agentic AI Governance Platform generally increases as agent autonomy, privilege levels, third-party ecosystem diversity and the consequences of incorrect actions rise.

Regional Insights

North America is the leading regional market under the study's narrow scope, supported by the highest concentration of confirmed commercial suppliers and the broadest coverage across full-stack control planes, cybersecurity, identity governance, cloud platforms and specialist AI governance. The region combines major incumbent software ecosystems with a large pool of emerging pure-play providers, creating competition between bundled native governance and independent cross-platform control layers. Europe has comparatively strong positioning in enterprise software, GRC and identity-oriented governance, while the regulatory environment reinforces enterprise investment in structured AI oversight; the EU AI Act became broadly applicable on August 2, 2026, although individual provisions follow different implementation timelines.

China currently has fewer confirmed narrow-scope suppliers than North America but is entering a more active product-development and commercialization phase. China's May 2026 intelligent-agent policy emphasizes safe and controllable development, standards

systems, security governance, toolchain development and multi-agent collaboration, providing a clearer policy foundation for domestic Agentic AI Governance Platform adoption and product formation. Israel maintains a notable concentration of security- and identity-oriented specialist vendors, while Japan, South Korea, Southeast Asia, India and Taiwan currently show fewer independently verified narrow-scope platforms and are more reliant on international cloud, security and systems-integration ecosystems. Regional competitive structures are therefore likely to remain differentiated, with North America emphasizing platform innovation and specialization, Europe emphasizing governance and regulatory alignment, and China combining domestic cloud and cybersecurity ecosystems with emerging policy-driven demand.

Competitive Landscape Analysis

The Agentic AI Governance Platform market remains fragmented and is characterized by convergence among enterprise software, specialist AI governance, cybersecurity, identity security and cloud-platform providers. The established core formal list contains 53 confirmed suppliers, while the report ranking retains 50 companies to represent the breadth of the competitive field rather than implying an unsupported concentrated market-share structure. Large enterprise platforms compete through installed customer bases, workflow integration and bundled distribution; specialist governance vendors emphasize platform neutrality and governance depth; cybersecurity vendors concentrate on runtime threats and behavioral controls; and identity-security providers increasingly treat AI agents as non-human identities requiring accountable ownership, delegated authority and continuous authorization. Current product development from Microsoft, IBM and ServiceNow illustrates the shift toward centralized enterprise control planes capable of governing agents across increasingly heterogeneous environments. Strategic consolidation is also strengthening the security and identity route: Palo Alto Networks completed its acquisition of CyberArk on February 11, 2026, demonstrating the growing strategic importance of identity security within the broader AI security architecture. Future competition is expected to shift away from basic registry and visibility capabilities toward cross-platform discovery, contextual runtime authorization, policy enforcement before execution, unified audit evidence and governance of multi-agent interactions without requiring customers to standardize on a single model, framework or cloud ecosystem.

Report Scope

LPI (LP Information)' newest research report, the "Agentic AI Governance Platform Industry Forecast" looks at past sales and reviews total world Agentic AI Governance

Platform sales in 2025, providing a comprehensive analysis by region and market sector of projected Agentic AI Governance Platform sales for 2026 through 2032. With Agentic AI Governance Platform sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Agentic AI Governance Platform industry.

This Insight Report provides a comprehensive analysis of the global Agentic AI Governance Platform landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on Agentic AI Governance Platform portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Agentic AI Governance Platform market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Agentic AI Governance Platform and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Agentic AI Governance Platform.

This report presents a comprehensive overview, market shares, and growth opportunities of Agentic AI Governance Platform market by product type, application, key players and key regions and countries.

Market Segmentation

Segmentation by Type:

Full-stack Agent Governance Control Plane

AI Governance and GRC-led Platform

Agent Security-led Platform

Agent Identity and Access Governance

Others

Segmentation by Deployment Model:

- Standalone Governance Platform
- Security or Identity Platform Extension
- Enterprise Software or Cloud-native Module
- Others

Segmentation by Agent Estate Coverage:

- Cross-platform Agent Governance
- Ecosystem-native Agent Governance
- Domain- or Asset-centric Governance
- Others

Segmentation by Application:

- Healthcare and Life Sciences
- Government and Public Sector
- Technology and Telecommunications
- Others

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analyzing the company's coverage, product portfolio, its market penetration.

Microsoft Corporation

ServiceNow, Inc.

IBM

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Agentic AI Governance Platform Market Size (2021-2032)
 - 2.1.2 Agentic AI Governance Platform Market Size CAGR by Region (2021 VS 2025 VS 2032)
 - 2.1.3 World Current & Future Analysis for Agentic AI Governance Platform by Country/Region (2021, 2025 & 2032)
- 2.2 Agentic AI Governance Platform Segment by Type
 - 2.2.1 Full-stack Agent Governance Control Plane
 - 2.2.2 AI Governance and GRC-led Platform
 - 2.2.3 Agent Security-led Platform
 - 2.2.4 Agent Identity and Access Governance
 - 2.2.5 Others
 - 2.2.6 Agentic AI Governance Platform Market Size by Type
 - 2.2.6.1 Agentic AI Governance Platform Market Size CAGR by Type (2021 VS 2025 VS 2032)
 - 2.2.6.2 Global Agentic AI Governance Platform Market Size Market Share by Type (2021-2026)
- 2.3 Agentic AI Governance Platform Segment by Deployment Model
 - 2.3.1 Standalone Governance Platform
 - 2.3.2 Security or Identity Platform Extension
 - 2.3.3 Enterprise Software or Cloud-native Module
 - 2.3.4 Others
 - 2.3.5 Agentic AI Governance Platform Market Size by Deployment Model
 - 2.3.5.1 Agentic AI Governance Platform Market Size CAGR by Deployment Model

(2021 VS 2025 VS 2032)

2.3.5.2 Global Agentic AI Governance Platform Market Size Market Share by Deployment Model (2021-2026)

2.4 Agentic AI Governance Platform Segment by Agent Estate Coverage

2.4.1 Cross-platform Agent Governance

2.4.2 Ecosystem-native Agent Governance

2.4.3 Domain- or Asset-centric Governance

2.4.4 Others

2.4.5 Agentic AI Governance Platform Market Size by Agent Estate Coverage

2.4.5.1 Agentic AI Governance Platform Market Size CAGR by Agent Estate Coverage (2021 VS 2025 VS 2032)

2.4.5.2 Global Agentic AI Governance Platform Market Size Market Share by Agent Estate Coverage (2021-2026)

2.5 Agentic AI Governance Platform Segment by Application

2.5.1 Healthcare and Life Sciences

2.5.2 Government and Public Sector

2.5.3 Technology and Telecommunications

2.5.4 Others

2.5.5 Agentic AI Governance Platform Market Size by Application

2.5.5.1 Agentic AI Governance Platform Market Size CAGR by Application (2021 VS 2025 VS 2032)

2.5.5.2 Global Agentic AI Governance Platform Market Size Market Share by Application (2021-2026)

3 AGENTIC AI GOVERNANCE PLATFORM MARKET SIZE BY PLAYER

3.1 Agentic AI Governance Platform Market Size Market Share by Player

3.1.1 Global Agentic AI Governance Platform Revenue by Player (2021-2026)

3.1.2 Global Agentic AI Governance Platform Revenue Market Share by Player (2021-2026)

3.2 Global Agentic AI Governance Platform Key Players Head office and Products Offered

3.3 Market Concentration Rate Analysis

3.3.1 Competition Landscape Analysis

3.3.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.4 New Products and Potential Entrants

3.5 Mergers & Acquisitions, Expansion

4 AGENTIC AI GOVERNANCE PLATFORM BY REGION

- 4.1 Agentic AI Governance Platform Market Size by Region (2021-2026)
- 4.2 Global Agentic AI Governance Platform Annual Revenue by Country/Region (2021-2026)
- 4.3 Americas Agentic AI Governance Platform Market Size Growth (2021-2026)
- 4.4 APAC Agentic AI Governance Platform Market Size Growth (2021-2026)
- 4.5 Europe Agentic AI Governance Platform Market Size Growth (2021-2026)
- 4.6 Middle East & Africa Agentic AI Governance Platform Market Size Growth (2021-2026)

5 AMERICAS

- 5.1 Americas Agentic AI Governance Platform Market Size by Country (2021-2026)
- 5.2 Americas Agentic AI Governance Platform Market Size by Type (2021-2026)
- 5.3 Americas Agentic AI Governance Platform Market Size by Application (2021-2026)
- 5.4 United States
- 5.5 Canada
- 5.6 Mexico
- 5.7 Brazil

6 APAC

- 6.1 APAC Agentic AI Governance Platform Market Size by Region (2021-2026)
- 6.2 APAC Agentic AI Governance Platform Market Size by Type (2021-2026)
- 6.3 APAC Agentic AI Governance Platform Market Size by Application (2021-2026)
- 6.4 China
- 6.5 Japan
- 6.6 South Korea
- 6.7 Southeast Asia
- 6.8 India
- 6.9 Australia

7 EUROPE

- 7.1 Europe Agentic AI Governance Platform Market Size by Country (2021-2026)
- 7.2 Europe Agentic AI Governance Platform Market Size by Type (2021-2026)
- 7.3 Europe Agentic AI Governance Platform Market Size by Application (2021-2026)
- 7.4 Germany
- 7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Agentic AI Governance Platform by Region (2021-2026)

8.2 Middle East & Africa Agentic AI Governance Platform Market Size by Type (2021-2026)

8.3 Middle East & Africa Agentic AI Governance Platform Market Size by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 GLOBAL AGENTIC AI GOVERNANCE PLATFORM MARKET FORECAST

10.1 Global Agentic AI Governance Platform Forecast by Region (2027-2032)

10.1.1 Global Agentic AI Governance Platform Forecast by Region (2027-2032)

10.1.2 Americas Agentic AI Governance Platform Forecast

10.1.3 APAC Agentic AI Governance Platform Forecast

10.1.4 Europe Agentic AI Governance Platform Forecast

10.1.5 Middle East & Africa Agentic AI Governance Platform Forecast

10.2 Americas Agentic AI Governance Platform Forecast by Country (2027-2032)

10.2.1 United States Market Agentic AI Governance Platform Forecast

10.2.2 Canada Market Agentic AI Governance Platform Forecast

10.2.3 Mexico Market Agentic AI Governance Platform Forecast

10.2.4 Brazil Market Agentic AI Governance Platform Forecast

10.3 APAC Agentic AI Governance Platform Forecast by Region (2027-2032)

10.3.1 China Agentic AI Governance Platform Market Forecast

10.3.2 Japan Market Agentic AI Governance Platform Forecast

- 10.3.3 Korea Market Agentic AI Governance Platform Forecast
- 10.3.4 Southeast Asia Market Agentic AI Governance Platform Forecast
- 10.3.5 India Market Agentic AI Governance Platform Forecast
- 10.3.6 Australia Market Agentic AI Governance Platform Forecast
- 10.4 Europe Agentic AI Governance Platform Forecast by Country (2027-2032)
 - 10.4.1 Germany Market Agentic AI Governance Platform Forecast
 - 10.4.2 France Market Agentic AI Governance Platform Forecast
 - 10.4.3 UK Market Agentic AI Governance Platform Forecast
 - 10.4.4 Italy Market Agentic AI Governance Platform Forecast
 - 10.4.5 Russia Market Agentic AI Governance Platform Forecast
- 10.5 Middle East & Africa Agentic AI Governance Platform Forecast by Region (2027-2032)
 - 10.5.1 Egypt Market Agentic AI Governance Platform Forecast
 - 10.5.2 South Africa Market Agentic AI Governance Platform Forecast
 - 10.5.3 Israel Market Agentic AI Governance Platform Forecast
 - 10.5.4 Turkey Market Agentic AI Governance Platform Forecast
- 10.6 Global Agentic AI Governance Platform Forecast by Type (2027-2032)
- 10.7 Global Agentic AI Governance Platform Forecast by Application (2027-2032)
 - 10.7.1 GCC Countries Market Agentic AI Governance Platform Forecast

11 KEY PLAYERS ANALYSIS

- 11.1 Microsoft Corporation
 - 11.1.1 Microsoft Corporation Company Information
 - 11.1.2 Microsoft Corporation Agentic AI Governance Platform Product Offered
 - 11.1.3 Microsoft Corporation Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.1.4 Microsoft Corporation Main Business Overview
 - 11.1.5 Microsoft Corporation Latest Developments

11.20 BeyondTrust

- 11.20.1 BeyondTrust Company Information
- 11.20.2 BeyondTrust Agentic AI Governance Platform Product Offered
- 11.20.3 BeyondTrust Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
- 11.20.4 BeyondTrust Main Business Overview
- 11.20.5 BeyondTrust Latest Developments
- 11.21 Delinea
 - 11.21.1 Delinea Company Information
 - 11.21.2 Delinea Agentic AI Governance Platform Product Offered
 - 11.21.3 Delinea Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.21.4 Delinea Main Business Overview
 - 11.21.5 Delinea Latest Developments
- 11.22 Omada
 - 11.22.1 Omada Company Information
 - 11.22.2 Omada Agentic AI Governance Platform Product Offered
 - 11.22.3 Omada Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.22.4 Omada Main Business Overview
 - 11.22.5 Omada Latest Developments
- 11.23 Strata Identity
 - 11.23.1 Strata Identity Company Information
 - 11.23.2 Strata Identity Agentic AI Governance Platform Product Offered
 - 11.23.3 Strata Identity Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.23.4 Strata Identity Main Business Overview
 - 11.23.5 Strata Identity Latest Developments
- 11.24 WitnessAI
 - 11.24.1 WitnessAI Company Information
 - 11.24.2 WitnessAI Agentic AI Governance Platform Product Offered
 - 11.24.3 WitnessAI Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.24.4 WitnessAI Main Business Overview
 - 11.24.5 WitnessAI Latest Developments
- 11.25 Lasso Security
 - 11.25.1 Lasso Security Company Information
 - 11.25.2 Lasso Security Agentic AI Governance Platform Product Offered
 - 11.25.3 Lasso Security Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)

- 11.25.4 Lasso Security Main Business Overview
- 11.25.5 Lasso Security Latest Developments
- 11.26 Astrix Security
 - 11.26.1 Astrix Security Company Information
 - 11.26.2 Astrix Security Agentic AI Governance Platform Product Offered
 - 11.26.3 Astrix Security Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.26.4 Astrix Security Main Business Overview
 - 11.26.5 Astrix Security Latest Developments
- 11.27 Enzai
 - 11.27.1 Enzai Company Information
 - 11.27.2 Enzai Agentic AI Governance Platform Product Offered
 - 11.27.3 Enzai Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.27.4 Enzai Main Business Overview
 - 11.27.5 Enzai Latest Developments
- 11.28 Saidot
 - 11.28.1 Saidot Company Information
 - 11.28.2 Saidot Agentic AI Governance Platform Product Offered
 - 11.28.3 Saidot Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.28.4 Saidot Main Business Overview
 - 11.28.5 Saidot Latest Developments
- 11.29 Nutanix
 - 11.29.1 Nutanix Company Information
 - 11.29.2 Nutanix Agentic AI Governance Platform Product Offered
 - 11.29.3 Nutanix Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.29.4 Nutanix Main Business Overview
 - 11.29.5 Nutanix Latest Developments
- 11.30 Cisco
 - 11.30.1 Cisco Company Information
 - 11.30.2 Cisco Agentic AI Governance Platform Product Offered
 - 11.30.3 Cisco Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.30.4 Cisco Main Business Overview
 - 11.30.5 Cisco Latest Developments
- 11.31 Alibaba Group
 - 11.31.1 Alibaba Group Company Information

- 11.31.2 Alibaba Group Agentic AI Governance Platform Product Offered
- 11.31.3 Alibaba Group Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
- 11.31.4 Alibaba Group Main Business Overview
- 11.31.5 Alibaba Group Latest Developments
- 11.32 Tencent Holdings
 - 11.32.1 Tencent Holdings Company Information
 - 11.32.2 Tencent Holdings Agentic AI Governance Platform Product Offered
 - 11.32.3 Tencent Holdings Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.32.4 Tencent Holdings Main Business Overview
 - 11.32.5 Tencent Holdings Latest Developments
- 11.33 Qi-Anxin Technology Group
 - 11.33.1 Qi-Anxin Technology Group Company Information
 - 11.33.2 Qi-Anxin Technology Group Agentic AI Governance Platform Product Offered
 - 11.33.3 Qi-Anxin Technology Group Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
 - 11.33.4 Qi-Anxin Technology Group Main Business Overview
 - 11.33.5 Qi-Anxin Technology Group Latest Developments
- 11.34 Trend Micro Incorporated
 - 11.34.1 Trend Micro Incorporated Company Information
 - 11.34.2 Trend Micro Incorporated Agentic AI Governance Platform Product Offered
 - 11.34.3 Trend Micro Incorporated Agentic AI Governance Platform Revenue, Gross Margin and Market Share (2021-2026)
