## Abstracts

The global Agricultural Machinery Seals market size is predicted to grow from US\$ 11105 million in 2025 to US\$ 16683 million in 2032; it is expected to grow at a CAGR of 6.0% from 2026 to 2032.

In 2025, global sales of agricultural machinery seals reached 1.32 billion units, with an average selling price of US\$8.6 per unit. Global production capacity reached 1.65 billion units per year, and the industry's average gross profit margin was 18%-25%.

Agricultural machinery seals are compatible with various agricultural machinery such as tractors, harvesters, and rice transplanters. They are installed in key parts of the engine, hydraulic system, and transmission system. Made of sealing materials, they prevent oil and gas leaks and the intrusion of impurities such as dust and mud, ensuring the stable operation of agricultural machinery under harsh field conditions. They are core basic components for the normal operation of agricultural machinery. Upstream raw materials mainly consist of fluororubber, nitrile rubber, polyurethane, metal skeletons, and sealing additives. Downstream consumption is comprised of tractors, combine harvesters, rice transplanters, and other agricultural machinery. The supply relationship involves upstream raw material and component suppliers supplying midstream seal manufacturers, who then process, shape, and test the seals before supplying them to agricultural machinery manufacturers and the aftermarket. Demand mainly comes from the global advancement of agricultural mechanization, the increase in the number of agricultural machines in use, and the replacement of existing equipment. Business opportunities are concentrated in high-performance wear-resistant seals, sealing products adapted to new energy agricultural machinery, and the after-sales maintenance market. The future path will focus on material upgrades and structural optimization to meet the development needs of high-end agricultural machinery and green, environmentally friendly, and intelligent agricultural machinery.
