The global Agricultural Polymer market size is predicted to grow from US$ 7640 million in 2025 to US$ 10290 million in 2031; it is expected to grow at a CAGR of 5.1% from 2025 to 2031.

Agricultural polymer is a sheet-like material used mainly for mulching, tunnel cultivation, and in-house tunnel cultivation. Because of its weather resistance, agricultural polymer is effective in protecting crops from direct sunlight, cold winds, and rain. Agricultural film sheets can be broadly classified into soft and hard, with agricultural polycaps being classified as soft. Rigid film, on the other hand, is used for roof-type greenhouses.

Because of its versatility and softness, agricultural polymer is used as a versatile agricultural material for small tunnel films, plastic greenhouse curtains, and other applications. It can also be used as a mulching material by covering ridges to prevent weeds, mud splashes, frost protection, heat and moisture retention, and more.

United States market for Agricultural Polymer is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for Agricultural Polymer is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
