The global AGV Lithium-Ion Batteries market size is predicted to grow from US\$ 747 million in 2025 to US\$ 1226 million in 2031; it is expected to grow at a CAGR of 8.6% from 2025 to 2031.

Lithium-ion (Li-ion) AGV batteries are quickly becoming the standard in warehouses and other industrial applications due to their superior performance, energy density and safety features. Li-ion batteries offer longer runtimes and faster charging than traditional lead acid options, allowing for greater productivity and cost savings. These batteries also come with built-in safety features such as overcharge protection which helps prevent any risks associated with improper charging or storage. In addition, Li-ion batteries are eco-friendly and do not emit hazardous gases making them a safe choice for any indoor environment. The type of battery used to power AGVs is crucial to making the investment pay off. Lithium-ion batteries deliver much greater productivity due to their low maintenance requirements and larger capacity.
