The global AI SDK Software market size is predicted to grow from US\$ 266 million in 2025 to US\$ 408 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

AI software development kits (AI SDKs) provide developers with pre-built components, libraries, and tooling to embed artificial intelligence capabilities directly into applications. These kits enable teams to integrate AI features such as language processing, computer vision, speech recognition, generative functions, or agentic behavior without building core AI infrastructure from scratch. AI SDKs accelerate product development and reduce the complexity of implementing AI powered functionality. Rather than managing model training pipelines, infrastructure orchestration, or low level system configuration, developers can use structured SDK components to integrate AI features into web, mobile, desktop, or embedded applications.

United States market for AI SDK Software is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
