An AI server is a data server capable of providing artificial intelligence (AI). It can be used to support local applications and web pages, as well as provide complex AI models and services to cloud and local servers. AI servers help provide real-time computing services for various real-time AI applications.

AI healthcare is the use of machine learning (ML), natural language processing (NLP), deep learning (DL), and other AI-enabled tools to assist and, ideally, improve the patient experience, including diagnosis, treatment, and outcomes. In this regard, AI servers can play a big role.

AI in healthcare can be a critical tool for analyzing vast volumes of unique patient and raw medical information to create more accurate diagnoses and treatment plans. It can quickly analyze data from a variety of sources, identify potential problems, and recommend solutions across many contexts, including clinical and administrative environments.

Market Size: As an emerging industry, AI server has developed rapidly since its launch, and the market size has also continued to increase. In 2023, due to the tight supply of GPU in the market and the US-China trading polices, the price of AI servers soared greatly.

Intensified Competition: As the number of manufacturers and production capacity

increase, industry competition will intensify, leading to a reduction in the industry's profit margins.

Technology Trends: Due to the broad market prospects, some traditional server manufacturers have begun to get involved in the AI server industry, and there are also some new entrants, which will promote the technological progress of the AI server industry. Some technologies such as liquid cooling technology have been advanced and promoted in the AI server industry. As a high-tech industry in its infancy, there are still some technical difficulties in the AI server industry, such as the supply and development of upstream raw materials. With the advancement of technology, these problems will gradually be solved, and some new technologies will continue to emerge.
